01 Workshop

CHANGELOG

- **24 Aug 2026** — Refreshed the course slide deck and changelog.

Mastery Quiz: How it runs

First 30 minutes · in class

Canvas Quiz · invigilated

1 · Set up
Sit apart, open Canvas Quiz, and screen-record your primary device.

→

2 · Use notes
Notes made before the quiz are allowed; a secondary device may hold them.

→

3 · Answer fairly
If you contributed a selected question, skip it. Your score uses the remaining questions.

→

4 · Submit
Submit both the Canvas Quiz and your screen recording to the assignment folder.

Open book ≠ open internet. No consultation with AI, search engines, or public websites during the quiz.

After the quiz, we'll go over `e2` and then begin the **project design critique.**

Break — 5 minutes

BEFORE CRITIQUE RESUMES

☕ BREAK

Upload your quiz screen recording to Canvas by **12:00 noon**. Confirm that the file is saved, then take a short break before the project critique.

05:00

▶ Start Timer

02 Announcements

Essay 2: Build a 10-15 minute reuseable course resource

Focus

Choose a week from the two assigned weeks (one from the first half of the course, one from the second half) and reinforce one lecture example.

→

Design

Create a 15–20 minute tutorial question or programming exercise.

→

Build

Deliver the exercise in an iPython / Jupyter notebook for a future course cohort.

- If you choose a week that has not yet run, use its description in the **course schedule** to synthesise an appropriate example, explanation, and exercise flow.
  - Why choose something you haven't learned yet? It can be helpful for your project!
- As with `e1`, you will be assigned to critique the outcome in **Week 09**.
- A card-suit lens or ethics thread is **optional**: include one only if it genuinely strengthens the exercise.

03 Project design review

Project Critique: How it runs

- (5 minutes per project team + 3 minutes staff critique) × 7 teams = ~1 hour
- Min will run the slides from his machine
- Zoom recording will allow you to review the feedback
- Assigned peer teams to give **constructive** comments on their assigned team on their assigned criterion category
  - Most teams have at least three members, you can assign a comment to each criterion.
  - Due by **Mon, 5 Oct 2026 · 23:59 SGT**.

Project Critique: your assigned lens

Give one constructive, specific comment on the criterion assigned to your peer team. Each team has a five-minute hard presentation limit; staff and peers ask questions afterwards.

1 · Presentation

- Clear motivation
- Logical structure and layout
- Appropriate images, plots, or figures

2 · Methodology

- Task, dataset, and related resources
- Proposed approach and evidence so far
- Current challenges or open questions

3 · Administration

- Distribution of workload
- Next steps, milestones, and timeline
- One actionable improvement

Post your assigned peer comment on Canvas by Mon, 5 Oct 2026 · 23:59 SGT.

NEXT WEEK PRE-LECTURE EXERCISE

One list, two plausible orders

Canvas discussion board · complete by **Mon, 5 Oct 2026 · 23:59 SGT**

> **Choose five items from a recommendation domain you used this week. Order the same set twice for different resasons. Explain the reason by identifying one item whose position changes, and explaining why.**

Your post: Name the domain, list both complete orders, and explain the changed position.

Then post a constructive reply to one classmate's post. Name and apply one treatment lens in your comment: ♠ ♦ ♥ ♣.
